

# Carbon Monoxide Alarm

## stabo CO Alarm IV

Be safe at home! The **stabo CO Alarm IV** detects CO at low concentrations using a sensitive electrochemical sensor and triggers alarm. In the event of an alarm, you will be alerted by a red light and a loud signal exceeding 85dB@3m. The integrated LCD display of the stabo CO-Alarm IV provides additional security and clear information. The device is easy to install and has a lifetime of up to 10 years for protection. Thanks to its compact design, it can be placed on ceilings using either the 3M adhesive pad™ or screws.

### Technical data

Power supply: **DC 3V (CR123A)**

Standard: **EN 50291-1:2018+AC:2021**

Sensor lifetime: **10 Years**

Sensor model: **Electrochemical**

Standby power: **<25uA**

Alarm sound: **>85db@3m**

Operating temperature: **-10~40°C**

Operating humidity: **≤95%**

Display: **LCD display**

Installation: **Mounting with Screws or 3M adhesive pad™**

Size: **86,5mm \* 86,5mm \* 30,5mm**
